## Section 1 - Basic Instructions

### 1 Council for Affordable Quality Health Care (CAQH)

CAQH is a non-profit alliance of health plans and trade associations focused on achievable, concrete initiatives designed to strengthen the nation's health care system and simplify health care administration. The CAQH CORE Phase I & II operating rules have been adopted by the Department of Health and Human Services as necessary business rules and guidelines for the electronic exchange of information. These operating rules are incorporated into this companion document.

### 2 Business Purpose

The purpose of generating a 270 Inquiry is to allow providers to determine if, and what, benefits and coverage an Anthem member with an ID card has for a specific period of time. To obtain the highest possibility of a patient match for eligibility, the following five primary identifiers should be supplied.

- Patient's First Name, in its entirety (10 characters): Loop 2100D, NM104 (if subscriber is the patient); Loop 2100C, NM104 (if dependent is the patient)
- Patient's Last Name: Loop 2100D or Loop 2100C, NM103
- Patient's Date of Birth: DMG02
- Subscriber ID Number exactly as it appears on the Anthem ID card including alphanumeric prefix, if applicable: NM109
- Dates of Eligibility requested by Provider: DTP03

When the criteria are not met, the AAA segments of the 271 Response will indicate the reason for why the 270 Inquiry has been rejected.

### 3 Delimiters

Anthem accepts the following delimiters as defined by the ANSI standards of the basic character set:

- Data Element Separator, Asterisk (\*)
- Repetition Separator (ISA11), Caret (^)
- Sub-Element Separator, Colon (:)
- Segment Terminator, Tilde (~)

***NOTE! Since the above values are the only delimiters supported, the use of any other values will yield a file level rejection. Using values from the extended character set is not permitted without a mutual written agreement between Anthem and trading partner***

### 4 Uppercase Letters

Anthem requests that all data be entered in UPPERCASE letters only.

### 5 Social Security Number

Unless requested, do not send Social Security Number (34, SY) in the following loops of the 270 TR3:

- Loop 2100B NM108 Information Receiver Name (34)
- Loop 2100B REF01 Information Receiver Additional Identification (SY)
- Loop 2100C REF01 Subscriber Additional Identification (SY)
- Loop 2100C PRV02 Provider Information (SY)
- Loop 2100D REF01 Dependent Additional Identification (SY)
- Loop 2100D PRV02 Provider Information (SY)

**6 Communication Protocol Specifications (not applicable to those transitioned to Availability)**

- Transactions Per Second (TPS) Threshold. Must be no more than 20 transactions per second. This rate is a guideline and is not the rate Anthem expects regularly. Do not use the TPS threshold to send transaction bursts or mimic batch processes. The TPS threshold is a combined maximum across all concurrent threads your application may establish.
- HTTPS Connectivity. HTTPS connectivity is available through the internet.

Web Address. Use the HTTPS URL address where an embedded 270 message may be sent using the HTTPS protocol for a 271 response.

Real-Time URL (single inquiry only): <https://www.edirealtime.com/edirealtimeph2/edirealtime>

**HTTPS Message Format.** Input parameters (see table, HTTPS and SOAP metadata) for real-time needs to be submitted on the 270 request data in order to receive a 271 response message.

**SOAP Message Format.** SOAP used the same field descriptions as HTTPS, but in SOAP format. You must request WSDL files for SOAP processing.

SOAP URL: <https://www.hipaaiaswebservice.com/wsedirealtime/wsedirealtime>

HTTPS and SOAP Metadata (Real-Time)			
Field Name	Description	Format	Example
PayloadType	Specifies the type of payload included within a request.	Text	<b>X12_270_Req est_005010X27 9A1</b>
ProcessingMode	Indicates Batch or Real-Time processing mode.	Text	<b>RealTime</b>
PayloadID	Identifies the request submitted.	Alphanumeric, may contain hyphen	
EncType	Form Data Type	multipart/form-data	
TimeStamp	Time and Date specifying when a message is created and sent to a receiver.	Universal Time (UTC) <a href="http://www.w3.org/TR/xmlsch&lt;br/&gt;ema11-2/#date/Time">http://www.w3.org/TR/xmlsch ema11-2/#date/Time</a>	<b>2010-02- 22T15:15:52Z</b>
UserName	Is used to log into the account. A password will be associated with the User which allows a request to complete. Username is assigned.	6-12 characters; not case sensitive	
Password	Pairs with the <i>User</i> field to allow access to the eligibility request system. Password is assigned.	6-12 characters; case sensitive	
SenderID	Represents the Sender ID (ISA06) from the X12 file being submitted.	Alphanumeric	
ReceiverID	Represents the Receiver ID (ISA08) from the X12 file being submitted.	Alphanumeric	<b>040</b>
CORERuleVersion	Represents the CORE Rule version; can be used to maintain backward compatibility when parsing/processing messages.	Version number	<b>2.1.0</b>
Payload	Contains the file with the X12 request data.	HIPAA X12 Compliant	

**HTTPS Error Messages**

The following are the different message responses and error notifications that may be received when submitting 270 requests.

- **HTTP 202 Ok.** When authorization is passed and interface is successful with eligibility systems, HTTP 202 Ok status code and the 271 response X12 data content will be returned by the application.
- **Authorization Errors.** If the username and/or password included in the request are not valid, HTTP 403 Forbidden error response with no data will be returned by the application.
- **Server Errors.** When the CAQH connectivity application is not able to process a real-time request due to interface failures or Eligibility system unavailability etc., standard 5xx series error such as HTTP 500 Internal Server Error or HTTP 503 Service will be returned by the application. In this scenario, the 270 request submitter will need to resubmit the request since the application process for 271 message reply failed.

**7 System Hours of Availability**

As a CORE-certified health plan, Anthem follows the guidelines as set forth under Section 1 of the CAQH CORE System Availability Rule. Regularly scheduled system downtime/maintenance will be reserved for Sundays and the following holidays:

- New Year’s Day (01/01/CCYY)
- Memorial Day (Last Monday in May)
- Independence Day (07/04/CCYY)
- Labor Day (First Monday in September)
- Thanksgiving Day (Fourth Thursday in November)
- Christmas Day (12/25/CCYY)

**8 Acknowledgements and/or Reports**

Submitting a 270 transaction, you will receive the following responses:

- Functional acknowledgement reports that includes TA1 (X12) & TA1 (864) when the ISA-IEA envelope cannot be processed and/or 999 when submitted 270 does not pass Level 2 HIPAA validation.
- 271 is returned in all other cases to indicate the member status.

**9 Receiver ID**

For Blue-branded business, trading partners submit the receiver ID values (ISA08 and GS03) associated to the provider of service. The Application Receiver ID (GS03) is submitted as DEN when requesting eligibility for dental policies.
