

Opioid prescriptions update

Commercial | Colorado • Connecticut • Georgia • Indiana • Kentucky • Maine • Missouri • Nevada • New Hampshire • New York • Ohio • Virginia • Wisconsin

Opioid pain relievers are commonly prescribed following surgery, injury, or for health conditions such as cancer. They may also be prescribed for moderate to severe acute dental pain.¹ While opioids can be effective for managing chronic pain and other conditions when properly administered, they carry significant risk when misused or abused.

Regular monitoring and identification of early risk factors is critical to recognizing patients who may be most at-risk for prescription drug abuse and those who need treatment. Commitment across the healthcare industry is critical to effectively fight prescription opioid abuse.

What dentists can do

As dentists, you have a significant role in ensuring appropriate prescription opioid use. To understand your role, you should be familiar with these two statements from the American Dental Association addressing opioid prescribing:

1) Statement on the Use of Opioids in the Treatment of Dental Pain² and 2) Statement on Provision of Dental Treatment for Patients with Substance Use Disorders.³ These statements outline opioid management considerations including the importance of:

- Registering with and using prescription drug monitoring program.
- Discussing with patients their responsibilities for preventing misuse, abuse, storage and disposal of prescription opioids.
- Using non-steroidal anti-inflammatory analgesics as the first-line therapy for acute pain management.
- Coordinating with other treating doctors, including pain specialists when prescribing opioids for management of chronic orofacial pain.
- Consulting with the patient's physician when the patient has a history of alcoholism or other substance use disorder.

The Centers for Disease Control and Prevention (CDC) notes that Prescription Drug Monitoring Programs (PDMPs) are among the most promising interventions to improve opioid prescribing, inform clinical practice, and protect patients at risk.⁴ What you need to know:

- Enroll in your local PDMP.

Anthem Blue Cross and Blue Shield is the trade name of: In Colorado: Rocky Mountain Hospital and Medical Service, Inc. HMO products underwritten by HMO Colorado, Inc. In Connecticut: Anthem Health Plans, Inc. In Georgia: Blue Cross Blue Shield Healthcare Plan of Georgia, Inc. In Indiana: Anthem Insurance Companies, Inc.
